Mr. Yean-Hsi Chang
Art Unit 2835
Commissioner for Patents
P. O. Box 1450
Alexandria, VA 22313-1450

Dear Mr. Chang:

Thank you for your time and assistance in clarifying my patent. I have read through your brief and attempted to solve the problems in which you informed me of. However, my understanding may not have been as clear as it should, but I tried to correct to the best of my understanding, your requirements.

Sincerely,

Eric Wells

Art Unit: 2835

Reference to Detailed Action

Drawings

I have completed the drawings in accordance to 37CFR 1.83(a), which show all features of the invention specified in the claims.

I have corrected drawing sheets in compliance with 37CFR 1.121(d)

Specifications

Defined

LDC – (Light Emitting Diode) – A small electrical device that generates light when current passes through it.

MCICIA – (Personal Computer Memory Card Industry Association) – A nonprofit industry association that standardized the 16 bit socket allowing portable computers to utilize credit card sized expansion cards.

CDL – This was a misprint. It should have been LDC

Claim Objections

I have shown the embodiment in Claims 5 –6 of the dispute of Landry.

I have made the panels slide out, which does not violate other claimed subject matter of Landry. The main point I was conveying is that they are removable, whether knocked out or slid out whereas the term "knocked out" means removable.

What is new in Claims 2-3 is that slide-out panels and slide-out bay fittings can both be interchanged for better fitting. Also, I was trying to show that by having the whole bay slides out, including removable slide-out panels, I can add devices, peripherals, and appliances, which no other subject matter states as part of their claims.
